BRE Expert Collection 3

Climate resilience

A collection of BRE expert guidance on managing climate risks in the built environment

To view the full range of IHS BRE Press publications visit www.brebookshop.com
Introduction

Welcome to the BRE Expert Collections.

IHS BRE Press is the exclusive publisher of BRE publications. Publications are produced in various series, which are outlined below. Information on how to purchase BRE publications is given on the next page, together with information about BRE and IHS.

This pdf contains a valuable collection of short BRE publications on managing climate risks in the built environment. It is one of a series of collections of BRE expert guidance and advice on the built environment, each offering exceptional value for construction professionals.

Adobe Acrobat Reader X or later for Windows or Macintosh is required to run this pdf. The pdf can be searched using the bookmarks panel and the links from the emboldened text on the Contents pages.

BRE publication types

**Digests** are authoritative summaries of the state-of-the-art on specific topics in construction design and technology. They draw on BRE expertise and provide essential support for all involved in design, specification, construction and maintenance.

**Information Papers** summarise recent innovation and research findings, and give advice on how to apply this information in practice.

**Good Building Guides** give concise guidance on the principles and practicalities of achieving good-quality building. These highly illustrated practical guides draw on BRE experience and research, and other sources, to provide clear technical advice and solutions.

**Good Repair Guides** are an extensively illustrated series, providing practical information on the identification, diagnosis and repair of defects. Good Repair Guides look at what went wrong, explain why, and give practical advice on how to put it right.

**Books, reports and manuals** present research, innovation, best practice and case studies in more detail.

**BRE Connect Online** is an online subscription to all BRE publications. Information about BRE Connect Online is included [HERE](#).
Buying BRE publications

Online: www.brebookshop.com to order hard copy and pdf publications

Tel: +44 (0) 1344 328038, Email: brepress@ihs.com

Mail: IHS BRE Press, Willoughby Road, Bracknell RG12 8FB, UK

About BRE

BRE Group (BRE) is a world-leading centre of built environment expertise, research and training, and includes a third-party approvals organisation offering certification of products and services to international markets.

BRE is owned by BRE Trust, the largest UK charity dedicated specifically to research and education in the built environment. BRE Trust uses the profits made by BRE to fund new research and education programmes that advance knowledge, innovation and communication for public benefit.

Information about BRE can be found HERE.

About IHS

IHS (NYSE: IHS) is the leading source of information, insight and analytics in critical areas that shape today’s business landscape. Businesses and governments in more than 165 countries around the globe rely on the comprehensive content, expert independent analysis and flexible delivery methods of IHS to make high-impact decisions and develop strategies with speed and confidence. IHS is the exclusive publisher of BRE publications.

IHS Global Ltd is a private limited company registered in England and Wales (no. 00788737).

Registered office: Willoughby Road, Bracknell, Berkshire RG12 8FB. www.ihs.com

Information about IHS can be found HERE.

Contents

Climate

Climate and site development:
Part 1 – General climate of the UK
Part 2 – Influence of microclimate
Part 3 – Improving microclimate through design
Climate change: impact on building design and construction
Cool roofs and their application in the UK
Designing roofs for climate change: modifications to good practice guidance
Designing urban streets to minimise heat island effects: understanding wind-driven convective heat transfer from the surfaces of inner-city buildings and streets
New materials in hot climates
Repairing frost damage:
Part 1 – Roofing
Part 2 – Walls

Wind

How to avoid damage and injuries during wind storms
Slate and tile roofs: avoiding damage from aircraft wake vortices
Static and dynamic wind loads on building-mounted microwind turbines
The assessment of wind loads:
Part 7 – Wind speeds for serviceability and fatigue assessments
Part 8 – Internal pressures
Wind loads on roof-mounted photovoltaic and solar thermal systems
Wind loads on unclad structures
Wind microclimate around buildings
Flooding

Applying flood resilience technologies  

Flood-resilient building:
Part 1 – Legislation, planning, flood-risk assessment and performance of buildings  
Part 2 – Building in flood-risk areas and designing flood-resilient buildings

BRE Expert Collections

The BRE Expert Collections provide compilations of BRE Digests, Good Building Guides, Good Repair Guides and Information Papers on specific built environment topics. Each collection gives guidance and advice from industry experts at BRE and offers exceptional value for construction professionals.

1. **Concrete in construction**
   A collection of BRE expert guidance on concrete materials, applications and performance

2. **Timber in construction**
   A collection of BRE expert guidance on timber materials, applications and performance

3. **Climate resilience**
   A collection of BRE expert guidance on managing climate risks in the built environment

4. **Resource efficiency, site operation and handover**
   A collection of BRE expert guidance on construction site operation and management

5. **Air quality, radon and airtightness**
   A collection of BRE expert guidance on the design and construction of new and existing buildings

6. **Daylight and shading**
   A collection of BRE expert guidance on designing for daylight and sunlight and shading of buildings

- Condensation and dampness
- Energy
- Fire and security
- Sustainability and green issues
Designing resilient cities: a guide to good practice

Review the future performance of urban development and regeneration-related ‘sustainability solutions’ with this guide which provides insights into the impacts of planning/design decisions and incorporates changing priorities and different ways of thinking. EP 103

The LifE Project: Long-term initiatives for flood-risk environments

Discover how an integrated design approach to sustainable, adaptable and safer development can allow us to live comfortably with water, not fight against it. This highly illustrated book shows how this can be achieved, what it might cost and how it might look. It combines planning policy with an integrated approach to masterplanning sustainable development, and promotes innovative architectural and landscape solutions for development in areas at risk of flooding. EP 98

Repairing flooded buildings

An insurance industry guide to investigation and repair

Compiled by the Flood Repairs Forum, this publication helps those who are less experienced in flood repairs to understand the basic insurance and technical issues involved, and the key elements of customer care - recognising that communication and management of expectation rest at the heart of many of the difficulties which can occur. EP 69

ALSO AVAILABLE

Potential implications of climate change in the built environment

Explore how climate change will have a significant impact on the built environment. This publication includes technical assessments of the potential impacts of wind, flooding, coastal erosion, subsidence, soil movement and driving rain, and discusses adaptation strategies. FB 2

The LifE handbook: Long-term initiatives for flood-risk environments

Manage and reduce unacceptable levels of flood risk by raising awareness and aiding delivery of more sustainable development. This short handbook is for decision makers, designers and developers before and during the early stages of design. EP 97

Thermal insulation: avoiding risks

Understand the more important technical risks associated with meeting the requirements of the building regulations for thermal insulation. Technical risks are highlighted and these are followed by actions that could be taken to avoid the risk. BR 262

Order @ www.brebookshop.com or phone +44 (0) 1344 328038

Available in print and pdf format
Reducing thermal bridging at junctions when designing and installing solid wall insulation

Learn how to minimise the effects of thermal bridging or inconsistency in thermal envelope performance when designing and installing solid wall insulation during refurbishment. This guide sets out clear principles and methods for reducing thermal bridging effects, maximising carbon emission reductions and minimising the risk of condensation. **FB 61**

Conventions for U-value calculations

Learn how to calculate U-values for different construction elements: roofs, walls, floors, basements, windows and doors using data relevant to typical UK constructions. Particular guidance is given on thermal conductivity of materials, and on various issues commonly arising when calculating U-values and how they apply to different construction types. **2006 edition** **BR 443**

U-value conventions in practice:

Worked examples using BR 443

Learn how to calculate thermal transmittance and thermal mass values of building materials in a unified and consistent way. Eight worked examples for wall, roof and floor designs are included. **FB 42**

ALSO AVAILABLE

A guide to the Simplified Building Energy Model (SBEM)

Learn how SBEM calculates the energy used by buildings and gain a practical insight into the processes and assumptions within the model. This guide for building services engineers and architects describes SBEM in words rather than equations. **FB 24**

Conventions for calculating linear thermal transmittance and temperature factors

Confirm the adequacy of junction details with this guidance on using numerical modelling to calculate heat loss by thermal bridging. Advice is also given on developing novel solutions to improve the thermal performance of junctions. **BR 497**

Order @ [www.brebookshop.com](http://www.brebookshop.com) or phone +44 (0) 1344 328038

Available in print and pdf format
The BRE Building Elements series provides more than 1500 pages of extensively illustrated practical details, descriptions and best practice advice provide an essential reference for all building professionals.

**Build to last**

with the BRE Building Elements series

**Roofs and roofing**
Learn about the materials and production methods used to construct roofs and roofing. Focus on the features that ensure good performance and the things that go wrong so that they can be avoided. 3rd edition
BR 504

**Floors and flooring**
Find out what to look for as good and bad features of floors and flooring. Get guidance on all floors, including screeds and underlays, as well as a range of finishes.
BR 460

**Foundations, basements and external works**
Review practical details and best practice about those parts of buildings in direct contact with the ground: foundations, piles, basements, drains, supply of utilities and boundary walls.
BR 440

**Building services**
Explore the gamut of fuelled, piped, ducted, wired and mechanical facilities which extend over the whole age range of the UK’s building stock.
BR 404

**Walls, windows and doors**
Get practical guidance on the main vertical building elements, both external and internal, including walls, windows, doors, separating walls, partitions and internal doors.
BR 352

**Understanding dampness**
Identify the causes of dampness, explore its effects and learn how to provide remedial measures. Discover how to tackle problems that exist in spite of all the available technical advice.
BR 466

Order @ [www.brebookshop.com](http://www.brebookshop.com) or phone +44 (0) 1344 328038

Available in print and pdf format and as individual books or as a set of 6
Quote ref. AP 243 to buy all 6 books for £195 (a saving of £85!)
BRE Connect Online
Build on your foundation of knowledge and expertise

WHAT IS BRE CONNECT ONLINE?
BRE Connect Online gives you access to the unrivalled expertise and insight of BRE – the UK’s leading centre of excellence on the built environment.
BRE Connect Online is an annual subscription service from IHS BRE Press giving online access to over 1700 new and published BRE titles

WHAT DO I GET?
ALL NEW AND PUBLISHED BRE TITLES
700 books, reports and guides – research, innovation, best practice and case studies, including:
• Foundations, basements and external works
• Roofs and roofing
• Site layout planning for daylight and sunlight
• The Green Guide to Specification
• Understanding dampness

250 Digests – authoritative state-of-the-art reviews

600 Information Papers – BRE research and how to apply it in practice

150 Good Building and Repair Guides – illustrated practical guides to good building and repair work

AND MUCH MORE ...

WHAT’S NEW IN 2015?
MORE THAN 50 NEW TITLES, INCLUDING:
• A technical guide to district heating
• Building on fill (new edition)
• Building in security at the design stage
• Dealing with damp and condensation
• Innovation in sustainable buildings
• Lighting and health
• Passive fire protection systems
• Radon: Guidance on protective measures for new buildings (new edition)
• Soakaway design (new edition)

All this for an annual subscription of only £399 + VAT
