BRE Expert Collection 5

Air quality, radon and airtightness

A collection of BRE expert guidance on the design and construction of new and existing buildings
Welcome to the BRE Expert Collections.

IHS BRE Press is the exclusive publisher of BRE publications. Publications are produced in various series, which are outlined below. Information on how to purchase BRE publications is given on the next page, together with information about BRE and IHS.

This pdf contains a valuable collection of short BRE publications on the design and construction of new and existing buildings taking account of air quality, radon and airtightness. It is one of a series of collections of BRE expert guidance and advice on the built environment, each offering exceptional value for construction professionals.

Adobe Acrobat Reader X or later for Windows or Macintosh is required to run this pdf. The pdf can be searched using the bookmarks panel and the links from the emboldened text on the Contents pages.

BRE publication types

**Digests** are authoritative summaries of the state-of-the-art on specific topics in construction design and technology. They draw on BRE expertise and provide essential support for all involved in design, specification, construction and maintenance.

**Information Papers** summarise recent innovation and research findings, and give advice on how to apply this information in practice.

**Good Building Guides** give concise guidance on the principles and practicalities of achieving good-quality building. These highly illustrated practical guides draw on BRE experience and research, and other sources, to provide clear technical advice and solutions.

**Good Repair Guides** are an extensively illustrated series, providing practical information on the identification, diagnosis and repair of defects. Good Repair Guides look at what went wrong, explain why, and give practical advice on how to put it right.

**Books, reports and manuals** present research, innovation, best practice and case studies in more detail.

**BRE Connect Online** is an online subscription to all BRE publications. Information about BRE Connect Online is included [HERE](#).

About BRE

BRE Group (BRE) is a world-leading centre of built environment expertise, research and training, and includes a third-party approvals organisation offering certification of products and services to international markets.

BRE is owned by BRE Trust, the largest UK charity dedicated specifically to research and education in the built environment. BRE Trust uses the profits made by BRE to fund new research and education programmes that advance knowledge, innovation and communication for public benefit.

Information about BRE can be found HERE.

About IHS

IHS (NYSE: IHS) is the leading source of information, insight and analytics in critical areas that shape today’s business landscape. Businesses and governments in more than 165 countries around the globe rely on the comprehensive content, expert independent analysis and flexible delivery methods of IHS to make high-impact decisions and develop strategies with speed and confidence. IHS is the exclusive publisher of BRE publications.

IHS Global Ltd is a private limited company registered in England and Wales (no. 00788737).

Registered office: Willoughby Road, Bracknell, Berkshire RG12 8FB. www.ihs.com

Contents

Air quality

Background ventilators for dwellings  
IP 2/03

Carbon monoxide detectors  
GG 30

Controlling particles, vapour and noise pollution from construction sites:
Part 1 – Pre-project planning and effective management  
PCG 1

Part 2 – Site preparation, demolition, earthworks and landscaping  
PCG 2

Part 3 – Haulage routes, vehicles and plant  
PCG 3

Part 4 – Materials handling, storage, stockpiles, spillage and disposal  
PCG 4

Part 5 – Fabrication processes and internal and external finishes  
PCG 5

Humidistat-controlled extract fans: performance in dwellings  
IP 5/99

Maintaining good air quality in your home  
IP 9/04

VOC emissions from building products:
Part 1 – Sources, testing and emission data  
DG 464-1

Part 2 – Control, evaluation and labelling schemes  
DG 464-2

Radon

Buildings and radon  
GG 25

Radon protection for new domestic extensions and conservatories with solid concrete ground floors  
GG 73

Radon protection for new dwellings  
GG 74

Radon protection for new large buildings  
GG 75

Radon solutions in homes:
Part 1 – Improving underfloor ventilation  
GR 37-1

Part 2 – Positive house ventilation  
GR 37-2

Part 3 – Radon sump systems  
GR 37-3

Radon solutions in older homes  
GR 38
Airtightness

Achieving airtightness:
Part 1 – General principles
Part 2 – Practical guidance on techniques: floors, walls and roofs
Part 3 – Practical guidance on techniques: windows and doors, sealing methods and materials
Airtightness of ceilings: energy loss and condensation risk
Continuous mechanical ventilation in dwellings: design, installation and operation
Improving ventilation in housing
Locating ventilation inlets to reduce ingress of external pollutants into buildings: a new methodology
Natural ventilation in non-domestic buildings
Positive input ventilation in dwellings
Ventilation and indoor air quality in schools
Ventilation rate measurement: new tracer gases and techniques for healthy indoor environments
Ventilators: ventilation and acoustic effectiveness

BRE Expert Collections

Related books 1
Related books 2
BRE Building Elements series
BRE Connect Online subscription service
The BRE Expert Collections provide compilations of BRE Digests, Good Building Guides, Good Repair Guides and Information Papers on specific built environment topics. Each collection gives guidance and advice from industry experts at BRE and offers exceptional value for construction professionals.

1 Concrete in construction
   A collection of BRE expert guidance on concrete materials, applications and performance

2 Timber in construction
   A collection of BRE expert guidance on timber materials, applications and performance

3 Climate resilience
   A collection of BRE expert guidance on managing climate risks in the built environment

4 Resource efficiency, site operation and handover
   A collection of BRE expert guidance on construction site operation and management

5 Air quality, radon and airtightness
   A collection of BRE expert guidance on the design and construction of new and existing buildings

6 Daylight and shading
   A collection of BRE expert guidance on designing for daylight and sunlight, and shading of buildings

More BRE Expert Collections coming soon:

- Condensation and dampness
- Energy
- Fire and security
- Sustainability and green issues
Radon: Guidance on protective measures for new buildings
Find out how to reduce the concentration of radon in new buildings, extensions, conversions, and refurbishment projects. This practical guide will help architects, designers, builders, and installers to specify and install successful protective measures to reduce risk of exposure to radon. It contains updated maps for identifying areas where radon protective measures should be installed.  
2015 edition BR 211

Airtightness in commercial and public buildings
Get comprehensive practical guidance on airtightness detailing for commercial, public and other non-domestic buildings. This guide gives you generic examples of common air leakage paths and advice on methods and materials suitable for sealing common construction detailing. FB 35

Ventilation for healthy buildings: reducing the impact of urban air pollution
Understand how to develop effective ventilation strategies for reducing the ingress of external pollutants into buildings while maintaining adequate ventilation. This publication provides invaluable practical guidance on achieving optimum ventilation in urban areas. FB 30

Also Available
Radon in the workplace
A guide for building owners and managers
Get practical guidance on reducing radon levels in workplaces. This guide is aimed mainly at employers, buildings owners and other non-specialists. It gives practical cost-effective solutions to reduce indoor radon levels to comply with legal requirements. 2nd edition FB 41

Control of dust from construction and demolition activities
Explore a range of dust control measures for construction site processes such as the movement of vehicles and construction plant, materials handling and storage, cutting, grinding, grouting, grit blasting, concrete batching and pouring. This guide also gives advice on pre-project planning, implementation and site management, together with checklists for construction-related activity of any size and type. BR 456

Order @ www.brebookshop.com or phone +44 (0) 1344 328038
Available in print and pdf format
Site layout planning for daylight and sunlight
This highly regarded BRE guide gives advice on site layout planning to achieve good sunlighting and daylighting both within buildings and in the open spaces between them. New material covers dense urban areas, trees and hedges. 2nd edition BR 209

The Green Guide to Specification
Need to reduce the environmental impact of your buildings? This guide is your essential tool for informed and responsible selection of construction materials and components. 4th edition BR 501

Lifetime Homes design guide
Learn how to design homes to meet the changing needs of households using the principles of inclusivity, accessibility, adaptability, sustainability and good value. These design solutions will enable easy adaptation and cost savings in the future. EP 100

Wheelchair housing design guide
Learn how to design and detail a home that is fully manageable by wheelchair users and maximises their independence. This activity-based guide: discusses design considerations, requirements and recommendations; provides design solutions; promotes strategies for social inclusion and cost benefits of designing to wheelchair accessibility standards. Over 150 detailed diagrams. 2nd edition EP 70

ALSO AVAILABLE
Thermal insulation: avoiding risks
Understand the more important technical risks associated with meeting the requirements of the building regulations for thermal insulation. Technical risks are highlighted and these are followed by actions that could be taken to avoid the risk. BR 262

Conventions for U-value calculations
Learn how to calculate U-values for different construction elements: roofs, walls, floors, basements, windows and doors using data relevant to typical UK constructions. Particular guidance is given on thermal conductivity of materials, and on various issues commonly arising when calculating U-values and how they apply to different construction types. BR 443

Order @ www.brebookshop.com or phone +44 (0) 1344 328038
Available in print and pdf format
The BRE Building Elements series provides more than 1500 pages of extensively illustrated practical details, descriptions and best practice advice provide an essential reference for all building professionals.

**Roofs and roofing**
Learn about the materials and production methods used to construct roofs and roofing. Focus on the features that ensure good performance and the things that go wrong so that they can be avoided. 3rd edition BR 504

**Floors and flooring**
Find out what to look for as good and bad features of floors and flooring. Get guidance on all floors, including screeds and underlays, as well as a range of finishes. BR 460

**Foundations, basements and external works**
Review practical details and best practice about those parts of buildings in direct contact with the ground: foundations, piles, basements, drains, supply of utilities and boundary walls. BR 440

**Building services**
Explore the gamut of fuelled, piped, ducted, wired and mechanical facilities which extend over the whole age range of the UK’s building stock. BR 404

**Walls, windows and doors**
Get practical guidance on the main vertical building elements, both external and internal, including walls, windows, doors, separating walls, partitions and internal doors. BR 352

**Understanding dampness**
Identify the causes of dampness, explore its effects and learn how to provide remedial measures. Discover how to tackle problems that exist in spite of all the available technical advice. BR 466

WHAT IS BRE CONNECT ONLINE?

BRE Connect Online gives you access to the unrivalled expertise and insight of BRE – the UK’s leading centre of excellence on the built environment. BRE Connect Online is an annual subscription service from IHS BRE Press giving online access to over 1700 new and published BRE titles.

WHAT DO I GET?

**ALL NEW AND PUBLISHED BRE TITLES**

700 books, reports and guides – research, innovation, best practice and case studies, including:
- Foundations, basements and external works
- Roofs and roofing
- Site layout planning for daylight and sunlight
- The Green Guide to Specification
- Understanding dampness

250 Digests – authoritative state-of-the-art reviews

600 Information Papers – BRE research and how to apply it in practice

150 Good Building and Repair Guides – illustrated practical guides to good building and repair work

AND MUCH MORE ...

WHAT’S NEW IN 2015?

MORE THAN 50 NEW TITLES, INCLUDING:

- A technical guide to district heating
- Building on fill (new edition)
- Building in security at the design stage
- Dealing with damp and condensation
- Innovation in sustainable buildings
- Lighting and health
- Passive fire protection systems
- Radon: Guidance on protective measures for new buildings (new edition)
- Soakaway design (new edition)

All this for an annual subscription of only £399 + VAT
